The transcript reflects the annual academic achievements of students during middle and high school, where we offer a unique curriculum integrating six years of the Colombian Baccalaureate with the International Baccalaureate Diploma Programme in 11th and 12th grades.

For this reason, in the last two years of high school, our students take six group IB subjects, three at higher level and three at standard level; the three core IB DP components and the compulsory subjects of our National Curriculum.

As a result, our academic program demands a superior standard than would be required from students in most other secondary Colombian schools or in other countries. This must be considered because our grades cannot be easily compared with those of others when translating our transcripts internationally.

The school uses the International Baccalaureate grading system (1-7, 7 being the highest score, 4 being the passing grade). Our students are graded with an unweighted scale. We do not have a credit system to calculate a GPA. The table on the right shows the equivalence of our

averages with the GPA. Our Secondary School starts in 7th grade.

Currently, at NCSC, the academic year consists of three trimesters, featuring seven daily 50-minute periods in a six-day cycle, with examinations in December and June. The final grades awarded at the end of the year are based on the evaluation of performance and prescribed criteria throughout the year.

The school offers a preparation course for the national examination called Pruebas Saber 11. Our curriculum does not include any preparation for international examinations; therefore, our students must prepare for these tests in their own free time. As part of the graduation requirements, our students must present the DELF and TOEFL exams. For any additional information, please get in touch with college.counselor@cambridgecali.edu.co.
